![SCT Sound Control Technologies logo]

Applies to: RCU2S™, RCU3SL™, RC4™

The custom cables provided by SCT include 0.4 meter long cables for attaching the Camera End module to the camera. For installations that require the camera to be placed farther away from the Camera End module, there are off-the-shelf products to accommodate this.

The RJ11/RJ12 and RJ45 connections can be extended by using straight through cables and couplers.

Examples:

Description	Make/Model	URL
RJ11/RJ12 straight through cable	Show Me Cables SKU: 15-302-007S	Click here
RJ11/RJ12 straight through coupler	Show Me Cables SKU: 523	Click here
RJ45 straight through cable	Show Me Cables SKU: 15-304-007S	Click here
RJ45 straight through coupler	Show Me Cables SKU: 516	Click here

SCT recommends using extension cables of 7ft maximum.
